📱 HireStack-App

PROFILE

Frontend Developer with **4+** years building production **React.js/Next.js** applications, including an AI-powered **Contract Lifecycle Management (CLM)** SaaS platform and a large-scale engagement for **Adani**. Re-architected an insecure authentication flow into a secure, **Redux-based token** system, resolved **30+** high-priority **production issues**, and **built reusable component** libraries that sped up team release cycles. Comfortable owning **frontend work** end-to-end — from **component architecture** and **state management** to production debugging.

PROFESSIONAL EXPERIENCE

Volody Products Pvt. Ltd 📍, *Frontend Developer*
2025/07 – Present | Mumbai, India

- Engineered core UI features for **Volody's AI-powered Contract Lifecycle Management (CLM) SaaS platform** used by high-scale enterprise clients.
- Led end-to-end frontend development for the **Adani client engagement**, delivering responsive, production-ready modules on schedule as part of the team.
- **Resolved 30+ high-priority client-reported production issues**, directly improving platform stability.
- Re-architected client authentication : replaced insecure local storage of tokens with secure **API-based token** managed via **centralized Redux state**.
- Contributed to the **Lawxy product** and integrated **WOPI** (Web Application Open Platform Interface) to enable in-app document viewing and editing.
- Integrated **REST APIs using Axios**, handling data fetching, loading states, and error recovery across the application.

Wipro 📍, *Frontend Developer*

2022/06 – 2025/06 | Mumbai, India

- Developed and maintained responsive web applications using **React.js, JavaScript (ES6+)**, HTML5, CSS3, Tailwind CSS, and Bootstrap.
- Built a **reusable component** library in React.js, reducing duplicate code across features and speeding up release cycles for the team.
- Managed application state across multiple features using **Redux Toolkit**.
- Improved frontend load performance using **code splitting, lazy loading, and memoization**.
- Provided **L2/L3 production support**: diagnosed root causes, triaged incoming bug tickets, and delivered fixes within **SLA deadlines**.
- **Integrated REST APIs** and managed asynchronous data fetching using **Axios and the Fetch API**.

EDUCATION

Bsc IT, *B.N.N College, Mumbai University*

2019/06 – 2022/05 | Bhiwandi, India

9.45/10.0

SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux Toolkit

Styling & UI: Tailwind CSS, Bootstrap, Responsive

Backend / DB: Node.js (Basic), Express.js (Basic), PostgreSQL, MySQL, MongoDB

APIs & Tools: RESTful APIs, Axios, Postman, Git, GitHub, Jira, Vite, Vercel, Unit Testing (Jest)

AI & Tools: Claude, AI Studio, Antigravity, VS Code

PROJECTS

HireStack 📍, *Tech-Stack: React.js, TypeScript, Vite, Tailwind CSS, Supabase, Node.js, GitHub Actions*

- Built a **job search platform** that pulls live job listings from **60+ top companies** into one place, so users can search and apply **without visiting each company's site** separately.
- Wrote a Node.js scraper with a separate adapter for each of **10+ different hiring platforms**, each with its **own API and data format**, scheduled to run automatically via **GitHub Actions**.
- Built user accounts with **Supabase** and a **job-alerts** feature that emails users daily when new jobs match their saved role, skills, and experience.

Travel Finder 📍, *Tech-Stack: Next.js, React,*

Node.js, PostgreSQL, Prisma ORM, Gemini 3.6 Flash

- **AI Travel Itinerary Generator:** Built a dynamic Next.js application using Gemini 3.6 and OpenStreetMap to generate hallucination-free, factual travel itineraries and budget estimations.
- **Serverless PostgreSQL Backend:** Architected a fast, session-less experience with Prisma ORM, using anonymous browser UUIDs to let users seamlessly save trips without needing to create an account.
- **Security & API Reliability:** Implemented strict Zod payload validation, custom database-backed rate limiting, and concurrency locks to optimize performance and prevent third-party API quota exhaustion.

Food Delivery Platform 📍,

Tech-Stack: React.js, Next.js, Express.js, MongoDB, JWT

- Built a **full-stack food ordering platform** with a customer-facing app and a separate **admin** dashboard, covering the complete order lifecycle from menu browsing to **real-time order tracking**.
- Implemented **JWT-based authentication** for both regular users and admins, including role-based access control to separate **customer** and **admin** permissions.
